March 13, 2017

Dear E3Live Family,

E3Live takes a very proactive approach in the testing and monitoring of our products and environment, making certain that everything that we offer to our E3Live family is of the highest and purest quality. The amount of testing we do on our products is not required by law, but done to reassure our clients that E3Live is a responsible company and that we truly care about the people we serve.

The testing results included below are for Radiation Testing on E3Live® and E3AFA®. This test covers all of our products that contain AFA (*Aphanizomenon flos-aquae*) algae, or extracts from the AFA, such as BrainON®. All test results have come back as below detection limits for possible contamination of radionuclides from the Japanese Nuclear Disaster on March 11, 2011.

RESULTS OF ANALYSES OF SOLID

Maxxim ID		DXH618		
Sampling Date		2017/01/03 01:00		
	UNITS	1204.003.17/AFA POWDER	RDL	QC Batch
Americium-241	Bq/g	<0.010	0.010	4883800
Cesium-134	Bq/g	<0.010	0.010	4883800
Cesium-137	Bq/g	<0.010	0.010	4883800
Cobalt-60	Bq/g	<0.010	0.010	4883800
Iodine-131	Bq/g	<0.010	0.010	4883800

RDL = Reportable Detection Limit

QC Batch = Quality Control Batch

We will continue to monitor Upper Klamath Lake and the products we offer for possible contaminants, to ensure that you receive only the highest quality AFA.

Thank you for your business and continued support,

CEO – Tamera Campbell
